EDUCATION

Ph.D., Iowa State University 2017 - Present
- School of Civil, Construction and Environmental Engineering, Intelligent Infrastructure Specialization.
- Advisor: Professor. Simon Laflamme

M.Sc., Georgia Institute of Technology 2016
- School of Civil Engineering and Environmental Engineering, Structures Specialization.
- Advisor: Professoor. Yang Wang

B.Sc., Central South University 2015
- Department of Civil Engineering, Structural Engineering Specialization.

PROFESSIONAL & TEACHING EXPERIENCES

Research Experiences

Research Assistant, Iowa State University, Ames, IA 2017 - Present
- Conducting research in the filed of Structural Health Monitoring with special interests on:

◇ *Smart Sensor Technology, Smart Materials and Structures*: Developed, prototyped and characterized a multifunctional CFRP sensor for both strengthening and large-scale structural health monitoring.

◇ *Adaptive systems*: Developing damage identification methods by adapting one dimensional & two dimensional models with sensor measurements for probability of detection.

◇ *Structural Health Monitoring and Damage Detection*: Investigated the use of a dense sensor network for crack detection from hardware and instrumentation to algorithms.

◇ *Resilient infrastructure*: Condition based long-term monitoring of a sign structure using data-driven approaches.

Research Assistant, Georgia Institute of Technology, Atlanta, GA 2016
- Experimental modal testing of a highway bridge for structural health monitoring.
- Structural modeling of a stadium and modeling techniques documentation.

Mentorship Experiences

Research Assistant, Iowa State University, Ames, IA 2017 - Present
- Mentored eight undergraduate students from Civil Eng., Mechanical Eng., and Industrial Eng. departments on sensor noise characterization, CFRP sensor development, computer vision, and sensing skin optimization, resulted in one publication which I an senior author.
- Mentoring one master student in Civil Eng. prototyping a new sensing skin.
- Mentored one Ph.D. student in Civil Eng. in experimental design and instrumentation of Alkali-Aggregate Reaction investigation.

Research Assistant, Georgia Institute of Technology, Atlanta, GA 2016
- Mentored three undergraduate students on structural modeling.

Teaching Experience

Teaching Assistant, Iowa State University, Ames, IA 2019
- CEE 332: Structural Analysis (undergraduate course with 74 students), Professor. An Chen.

PUBLICATIONS

Under Review

[1] **Jin Yan**, Simon Laflamme, Leifur Leifsson, An Chen.
"Dense Sensor Network Evaluation based on Model Assisted Probability of Detection."
Under review at Materials Evaluation.

Journals

PRESENTATIONS

- Multifunctional Carbon Fiber-Reinforced Polymer as structural capacitor for strain sensing.
Engineering Mechanics Institute Conference. Oral Presentation. Boston, MS, USA. 2018

- Model-assisted validation of a strain-based dense sensor network.
SPIE smart structures and nondestructive evaluation. Oral Presentation. Denver, CO, USA. 2019

- Probability of Detection in Dense Sensor Network Structural Health Monitoring Systems.
Engineering Mechanics Institute Conference. Oral Presentation. Pasadena, CA, USA. 2019

HONORS & AWARDS

- The American Society for Nondestructive Testing (ASNT) Fellowship 2018
- International Concrete Repair Institute (ICRI) Scholarship 2018
- National Scholarship (7/504), the highest-level scholarship in China 2015
- The First Prize Scholarship of Central South University 2014
- The First Prize in Mathematical Modeling Contest of Central South University 2014
- The Third Prize Scholarship of Central South University 2014
- The Second Prize in The Mathematical Contest in Modeling of Hunan Province 2013

ADVISING STUDENTS

Graduate Students

[2] Han Liu, M.Sc.; Civil Eng., Design and manufacturing of a new type of one-directional sensing skin for structural health monitoring. 2019 - present
